

SWALES & WILLIS

PUBLISHING MANAGEMENT

Our history

Swales & Willis was founded in 1998 to provide project management services to academic publishers. Since then we have continued to grow with the industry and are now a global supplier of print and digital services to a wide variety of academic publishing clients, both in the UK and overseas. Our excellent reputation with these clients is built on the foundation of superb editorial work, vast publishing and project management experience, and our willingness to embrace cutting-edge technologies to our clients' advantage.

What we do

Our experienced project managers will see your book or journal project through from manuscript to final deliverables, including copy-editing, typesetting, proofreading, indexing, artwork assessment and redraws, and digital supply – or any combination of these elements, depending on your requirements.

“
Thank you again for the efficiency and reliability of your company's production process. I have much experience with the publishing of books, and I have found this experience a superior one.
”

What we can offer:

Proven excellence in editorial and project management services

A friendly, approachable and personal ethos

Flexibility to adapt to the requirements of each project

A variety of electronic deliverables alongside traditional print products

XML-first workflows

Cloud-based proofing

A commitment to editorial quality and embracing new technologies

All our project managers are native English speakers and university graduates, trained by us to have exceptional standards and editorial expertise. We use only onshore editorial freelance suppliers as we believe this ensures the high editorial standards we and our clients expect. Our offshore partners supply large-capacity typesetting services and innovative digital solutions, including XML-first workflows and cloud-based editing and proofing suites. This system gives us flexibility in choosing the right suppliers for our customers, and means that we can deliver our projects on time, and on budget.
